Large Chickpeas/cwt							0.0	0		No
Other Pulse Crops/cwt							0.0	0		No
Soybeans/bu							0.0	0		No
Other Oilseeds/cwt							0.0	0		No
Peanuts/ton							0.0	0		No

¹County average yields provided by: www.fsa.usda.gov/FSA/webapp?area=home&subject=arpl&topic=landing or <http://quickstats.nass.usda.gov>.

²If in any year an actual yield falls below 75% of county average yield, 75% of the county average yield has been substituted prior to the calculation of the average.

³If in any year that the planted and considered planting acreage for a crop was zero, zero has been entered for that year and that year has been excluded in determining the average.

⁴Updated yield is 90% of the average of the yield per planted acre.

Disclaimer: This worksheet was developed from language in the Agricultural Act of 2014 and should be used only as a guide in determining whether to Update Yields. USDA/FSA will issue rules and regulations that will be the final authority in updating yield. Your decision on whether to update yields or not should be determined from final rules and regulations issued by USDA/FSA.
